...Professional service, Our Trademark

Dear A.I. Friends,

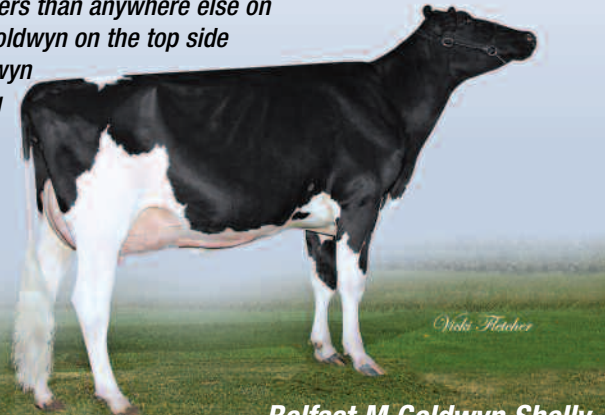

Sadly, Braedale Goldwyn died on November 24th just a month after he captured the coveted Premier Sire award at World Dairy Expo in Madison, Wisconsin. This genetic giant has proven he can "get it done" outside of the show ring too, ranking # 3 on both the Canadian LPI and US TPI lists with 99% reliability.

In Canada, we are blessed to have access to more milking Goldwyn daughters than anywhere else on the planet. We have embryos from many amazing new bull mothers with Goldwyn on the top side and from pedigrees to suit even the most discriminating Sire Analyst. Goldwyn is the got-to-have-more-of maternal grand-sire for forward-thinking young sire proving programs. I invite you to contact me directly for embryo and contract availability on the best daughters of this great legend.

Yours respectfully,

Paul Greaves
Greaveston Genetics Inc.

p.s. We have a few Goldwyn embryos available too.

Belfast M Goldwyn Shelly
